

To Whom It May Concern,

It is my pleasure to recommend **Ms. Joud Alharbi**, one of the most outstanding undergraduate students I have had the opportunity to teach and supervise. I taught her the Cybersecurity Operations course and supervised her graduation project, giving me the opportunity to closely evaluate her academic performance, technical skills, and professional qualities.

Throughout the Cybersecurity Operations course, Joud consistently demonstrated exceptional academic excellence. She achieved outstanding grades in all assessment components, including the course project, assignments, and examinations. She was also an active participant in class discussions, consistently showing strong analytical thinking and a solid understanding of cybersecurity concepts.

As a graduation project student, Joud distinguished herself through her dedication, discipline, creativity, and excellent planning skills. She is highly responsible, hardworking, and consistently delivers high-quality work while collaborating effectively within a team. Her ability to analyze complex problems and develop practical, innovative solutions reflects her strong potential as a cybersecurity professional.

Joud and her team participated in several project competitions and earned multiple awards, including **First Place for the Best Graduation Project in the Cybersecurity Department**. This achievement highlights her technical competence, perseverance, teamwork, and commitment to excellence.

Based on my experience working with her, I confidently give Joud my highest recommendation. I am certain that she will excel in any academic or professional opportunity she pursues and will make valuable contributions through her knowledge, integrity, and dedication.

Should you require any additional information, please do not hesitate to contact me.

Sincerely,

Dr. Sabreen Ahmadjee
Assistant Professor
Department of Cybersecurity
College of Computing
Umm Al-Qura University
